Interests

Sensing Systems, Signal Processing, Machine Learning, Radio Frequency Embedded Systems

Education

Carnegie Mellon University *2018 - 2024*

Ph.D. in Electrical and Computer Engineering — GPA: 3.9/4.0

Advisors: Prof. Anthony Rowe and Prof. Swarun Kumar

Committee Members: Prof. Aswin Sankaranarayanan and Prof. Mani Srivastava

Thesis: Pushing the limits of high resolution imaging with small form-factor mmWave radar

National Institute of Technology Karnataka *2014 - 2018*

B.Tech. in Electronics and Communication Engineering — GPA: 9.6/10.0

Professional Experiences

Carnegie Mellon University *Aug 2018 - May 2024*

Graduate Research Assistant at WiSE Lab and WiTech Lab

I am passionate about sensing systems. In my graduate research, I work on wireless sensing, that is, how wireless signals can help in sensing everyday objects better and provide new design operating points for classical sensing problems such as high resolution imaging, depth estimation, localization and robot navigation. My focus is on wireless sensing using **millimeter waves** which is at a sweet spot between low-frequency radio waves and high-frequency visible/infrared light. This brings in both pros and cons from these extreme frequency sensing worlds and presents opportunities and challenges to applications leveraging millimeter waves. My solutions tackle these challenges with new hardware and processing techniques and demonstrate new millimeter wave sensing capabilities with end-to-end system implementations. Read more here.

Zendar, Berkeley *May 2022 - Aug 2022*

Research Intern with Dr. Darsh Ranjan

I developed algorithms to tackle high-resolution sensing problems with automotive radar.

Optum, Pittsburgh *May 2021 - Aug 2021*

Corporate Startup Lab Fellow with Danita Kiser

I helped answer questions about large scale wireless connectivity technologies and build an actionable plan to bridge the urban/rural divide in accessing digital health solutions.

Texas Instruments, Dallas *May 2019 - Aug 2019*

Research Intern at Kilby Labs with Xiaolin Lu

I tackled the problem of wireless channel congestion and interference in IEEE 802.15.4 networks deployed in large industrial Internet of Things scenarios by devising machine learning pipelines that can predict the channel congestion ahead of time.

Microsoft Research, Bangalore *Aug 2017 - Dec 2017*

Research Intern with Dr. Harsha Simhadri

I built a real-time wake word detection pipeline to detect keywords like "Hey Cortana!" on extremely tiny, resource constrained IoT devices.

University of Lübeck, Germany *May 2017 - July 2017*

Research Intern with Dr. Alfred Mertins

I developed machine learning techniques to solve an audio processing problem of room impulse response interpolation.

Indian Institute of Science, Bangalore *May 2016 - July 2016*

Research Intern with Dr. GV Anand

I worked on fundamental signal processing estimation algorithms to determine direction of arrival of underwater acoustic signals in challenging noisy environments.

Research

Being a systems researcher, I enjoy leading large teams and collaborating with cross-university academics from diverse areas like circuits and theory, and researchers from various industries like semiconductors and transportation. My research, developed from working with these inter-disciplinary teams, has been published in major ACM/IEEE conferences - robotic venues such as IROS, ICRA and sensing systems venues such as MobiCom, MobiSys and Ubicomp, as listed subsequently.

Engineering Team Competitions

DARPA Subterranean Challenge 2019
As part of the CMU team, I performed initial experimentation on wireless mesh networking for consistent communication among robots, access points and base station in mines and caves.

IEEE Signal Processing Cup 2017
We built a real-time beat tracking algorithm running on an embedded device reacting to a variety of music signals. Check out our trippy visualizations here!.

IEEE Signal Processing Cup 2016
We developed a solution to extract power signal leaking into recorded audio signals and geolocate the power grid where audio was recorded. We finished top 15 in the world!

Teaching

As a graduate teaching assistant at CMU, I have developed course material, given lectures and recitations, and worked with students through homework assignments.

- Wireless Communication Fall 2021
- Computer Networks Spring 2020

I have also given guest lectures in the following courses.

- Intro to Computer Systems, CMU ECE Spring 2023
- Advanced Topics in Communication, UW EE Spring 2023

Service

- Reviewing:

- ACM Transactions on Sensor Networks 2022, 2023
- ACM IMWUT 2022
- Shadow Program Committee ACM Compass 2021

- Member of CMU ECE student council for interviewing potential faculty candidates from a graduate student point of view.
- Peer Mentor in CMU ECE's Peer Mentor Program organized by the Diversity, Inclusion and Outreach Committee.
- As the treasurer of CMU ECE Graduate Student Organization for 2020-2022, I was responsible for financial planning, budgeting and expense reporting for the organization's activities.
- Through CMU ECE Outreach program, I developed classes and conducted hardware building sessions to get high school students excited about basic electronics.
- I managed several projects, conducted talks, workshops and technical fests as the joint-secretary of IEEE Chapter at NITK.

Awards

- Best Presentation Runner Up, Ph.D. Forum ACM/IEEE IPSN 2023
