ENGINEERING  
TEAM  
COMPETITIONS

### **DARPA Subterranean Challenge 2019**

As part of the winning [CMU team](#), I performed initial experimentation on wireless mesh networking for consistent communication among robots, access points and base station in mines and caves.

### **IEEE Signal Processing Cup 2017**

We built a real-time beat tracking algorithm running on an embedded device reacting to a variety of music signals. Check out our trippy visualizations [here!](#).

### **IEEE Signal Processing Cup 2016**

We developed a solution to extract power signal leaking into recorded audio signals and geolocate the power grid where audio was recorded. We finished top 15 in the world!
