| RESEARCH                 | I am a wireless and cyber-physical systems researcher that builds <b>compact wireless systems with high quality sensing capabilities</b> . I achieve this by developing new hardware, leveraging machine learning and novel signal processing, and balancing system constraints on communication and sensing computation. I build end-to-end systems with transformative implications spanning cyber-physical systems, wireless communication and robotics. |                             |
